

SAFETY TOOL BOX MEETING

NO 6 - WORKING DRESS

1. Wear the right clothing for the job.
2. Always keep clothes clean. Dirty clothes can offer a fire or dermatitis risk.
3. Avoid loose clothing. The head scarf can throttle you.
4. If protective clothing is provided, wear it.
5. Gloves will protect your hands.
6. Finger rings are dangerous near moving machinery. Remove them or cover them with tape.
7. A safety helmet will protect your head and perhaps save your life.
8. Safety footwear saves toes.
9. Danger can strike upwards. Be sure your footwear has strong soles.
10. Remove contaminated clothing immediately and WASH – GOOD HYGIENE.
11. REMEMBER, cotton burns easier than wool.
12. It is worth dressing properly, even for a short job.

I have given the above talk to all men under my control.
